

# STEEL @OECD: EMISSIONS RELATED DATA TO BUILD STEEL DECARBONISATION INDICATORS

GFSEC Stakeholder Event – 21<sup>st</sup> September 2022

Contact: [cecile.seguineaud@oecd.org](mailto:cecile.seguineaud@oecd.org)

# Steel @OECD: A Steel Decarbonisation Dashboard

THEMATICS

Emissions

Net-zero targets

Production

Capacity

New Projects

Carbon Pricing

Figure 18. Production compatible with near zero emission steel

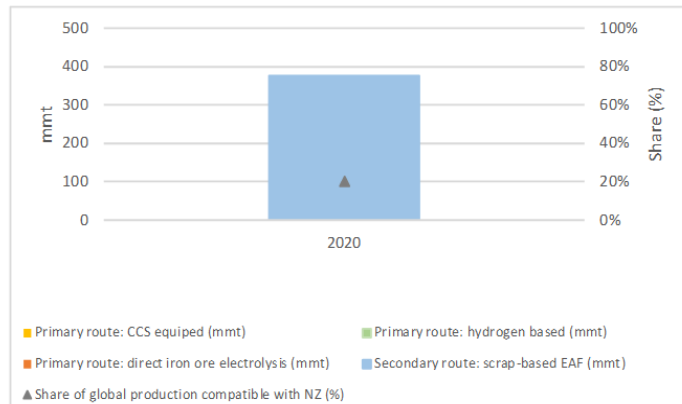

Figure 23. New steelmaking projects and related asset structure – Regional breakdown

Figure 11. Share of global crude steel production covered by a net-zero target – Level of ambition

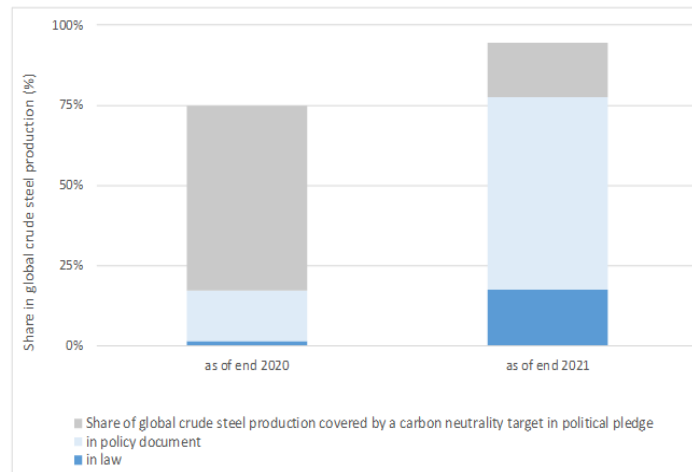

Figure 29. Maximum share of global capacity and production covered by a carbon price – Price breakdown

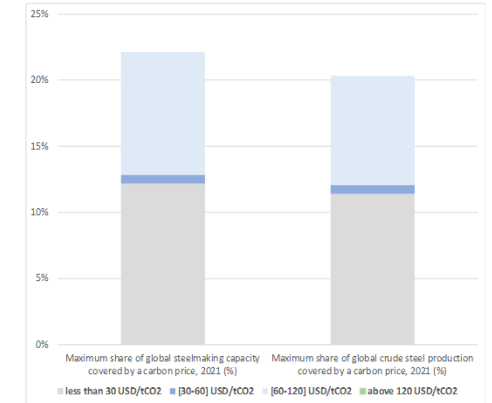

Figure 26. Innovative near zero emission steelmaking projects – Technology breakdown

# Key Metrics & Typical Challenges

## Emissions / Emission intensity of steel production as crucial inputs

### WHY KEY DATA?

**Accounting, Reporting, Monitoring**  
progress towards targets, policy impact

**Definition & compliance** with  
*'near zero or low-carbon emission steel production'*

**Criteria / Threshold on carbon content**  
(standards, taxonomy, trade...)

### COMPARABILITY

*Methodology,  
Scope of emission coverage, ...*

### AVAILABILITY

### CHALLENGES

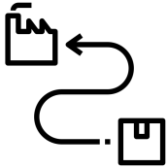

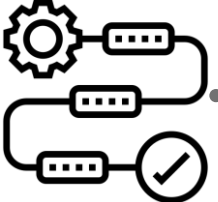

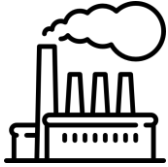

### GRANULARITY

*By production route,  
country, firms,  
plant level...*

# Identifying some Implementation Gaps

	Data Governance		
COMPARABILITY	Traceability, Certification, Reporting System		
COMPARABILITY	<b>A Common Methodology</b>		<ul style="list-style-type: none"><li>• Accounting emissions</li><li>• Emission content criteria, standards</li></ul>
AVAILABILITY, GRANULARITY	<b>Plant level data</b>		<ul style="list-style-type: none"><li>• Is production compliant with emission content criteria / standards?</li></ul>

# ANNEX

# About Steel @OECD

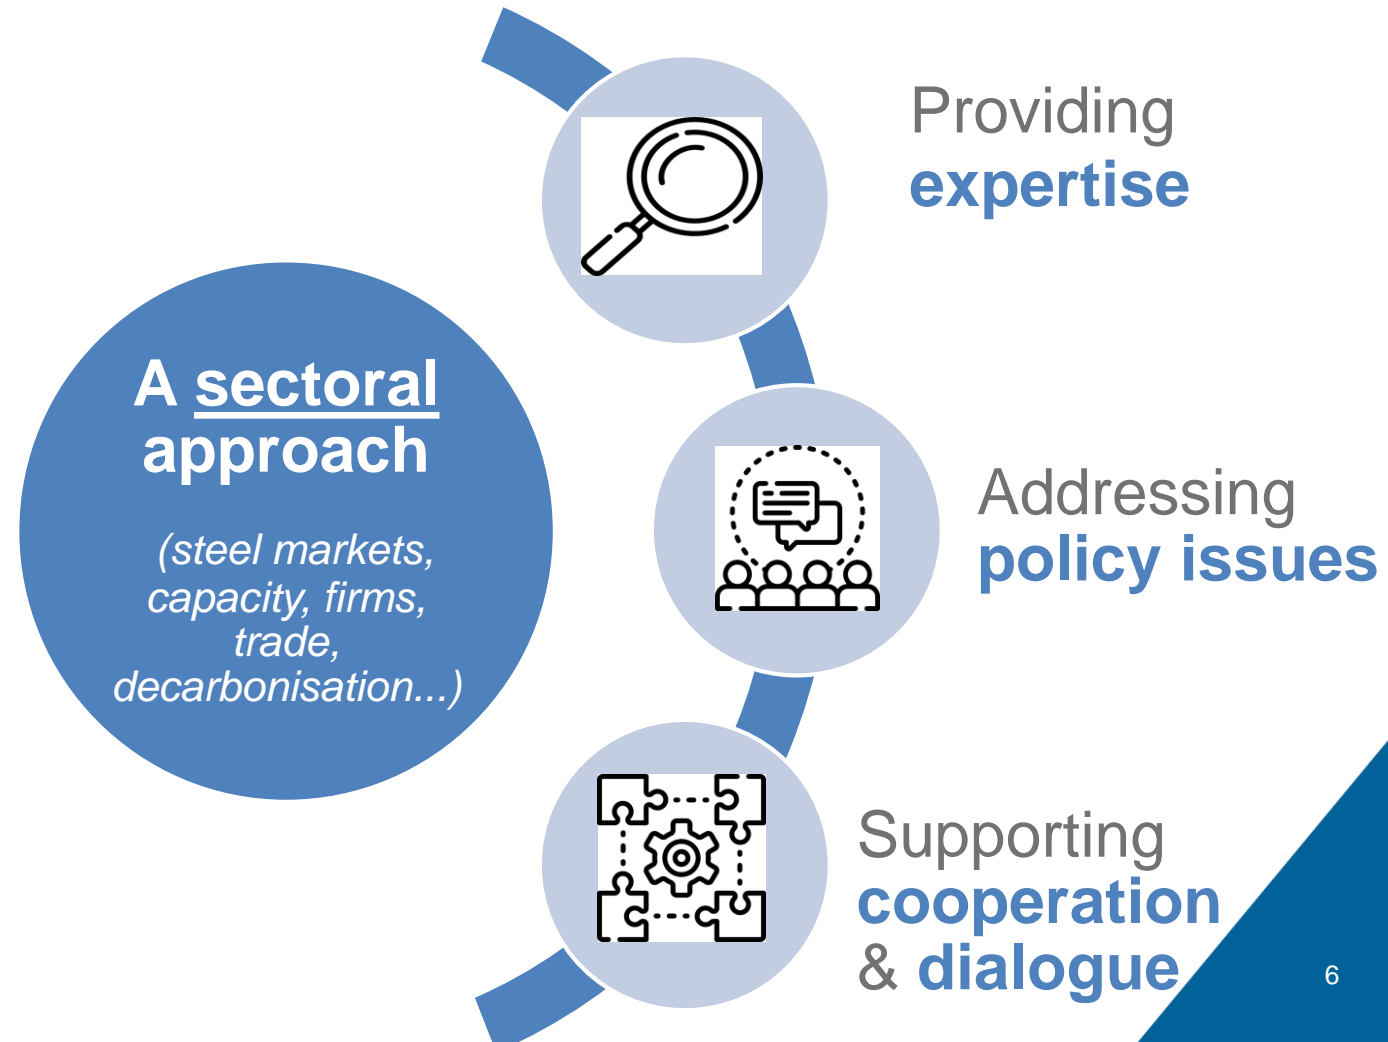

## A long-standing structure supporting the steel policy community

 **OECD STEEL COMMITTEE**

- A **unique forum** to address the steel industry's **challenges**
- **More than 30 Members & Participants** (OECD & non OECD), **steel associations**
- Established in **1978**

 **Global Forum on Steel Excess Capacity** **GFSEC**

- A multilateral platform to address **global excess-capacity**
- Established by the **G20** in **2016**, facilitated by the OECD, more than **30 Members**

# Decarbonisation related Data Work Streams

## OBJECTIVES

Highlight **Key Trends**

Measure **Progress**

Inform **Policymakers**

## Steelmaking capacity

- **Monitoring** of capacity development, including the structure of assets (**BOF vs EAF**)

## Low-carbon emissions steel projects

- **Monitoring** of announced projects

## Steel decarbonisation indicators

- Building **evidence-based indicators**
